Retail Sales & Customer Shopping Trends Dashboard

Customer Behavior, Revenue Performance & Retail Insights

KPI Summary

TOTAL REVENUE

$456,000

Strong topline driven by Electronics and Clothing — premium-priced categories anchor revenue.

TOTAL CUSTOMERS

1,000

Wide reach across age and gender — base is healthy but mostly single-purchase.

AVG PURCHASE VALUE

$456

Above $400 average ticket signals a premium-leaning basket — protect price integrity.

AVG REVIEW RATING

4.11

Higher-spend baskets correlate with better satisfaction — quality drives perceived value.

SUBSCRIPTION RATE

50.4%

Multi-unit / subscription-style baskets are a minority — major upsell opportunity.

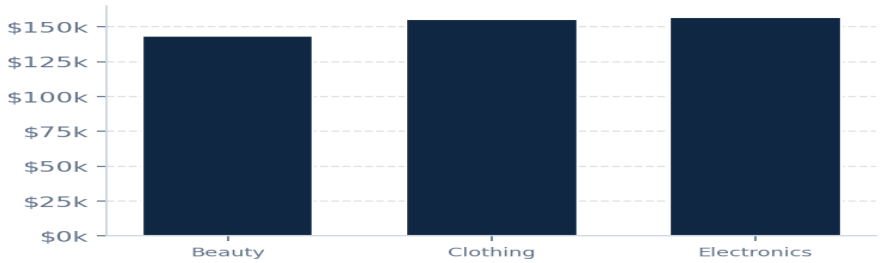
REPEAT CUSTOMER RATE

74.7%

Most baskets are one-off — investing in retention would unlock significant LTV.

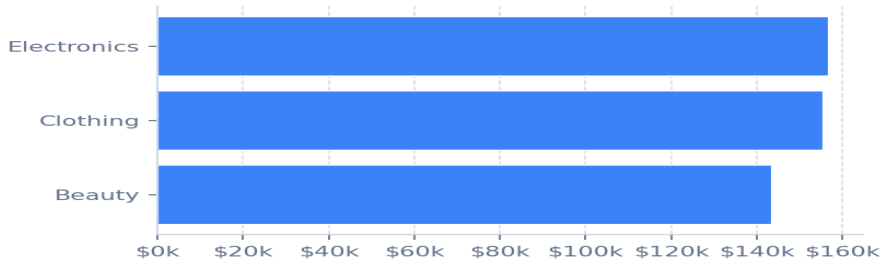
Sales Performance Analysis

Revenue by Product Category



- Electronics contribute the highest revenue share — strong category demand.
- All three categories perform within ~10% — well-balanced portfolio.
- Beauty trails slightly — a targeted promo could lift it to parity.

Top Selling Categories (Revenue Rank)



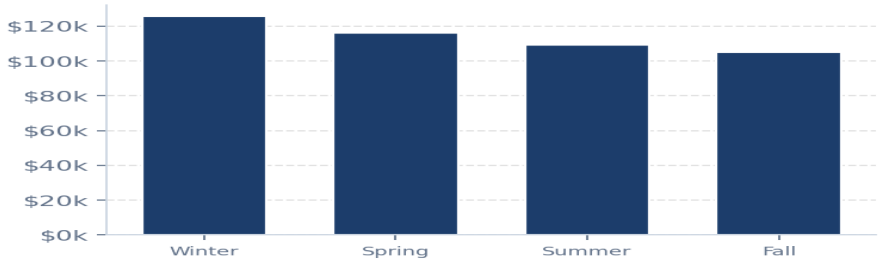
- Electronics leads, followed by Clothing — together they dominate revenue.
- Ranking is tight — small promo shifts could re-order leaders next quarter.

Retail Sales & Customer Shopping Trends Dashboard

Customer Behavior, Revenue Performance & Retail Insights

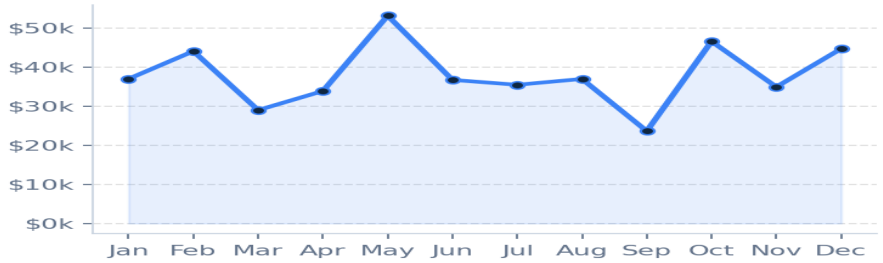
Sales Performance Analysis (cont.)

Seasonal Sales Trends



- Winter generates the highest sales revenue — strongest seasonal window.
- Fall is the softest season — opportunity for back-to-school / pre-holiday campaigns.

Monthly Revenue Trend



- May, October and December peak — aligned with seasonal events and end-of-year demand.
- September is the weakest month — clear candidate for a flash-sale calendar slot.

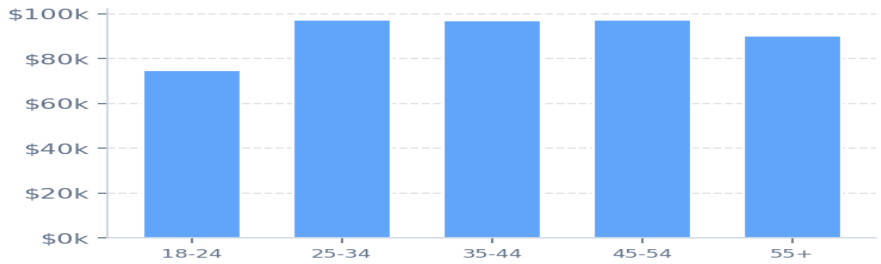
Customer Behavior, Revenue Performance & Retail Insights

Customer Analytics

Spending by Gender

- Female customers contribute slightly more revenue despite a near-even split.
- Gender mix is balanced — keep marketing inclusive rather than skewed.

Spending by Age Group

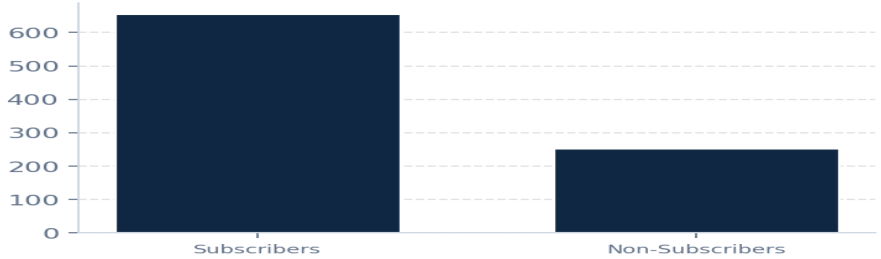


- 45-54 and 25-44 cohorts deliver the highest spending levels.
- 18-24 under-indexes — youth-focused acquisition campaign would expand the funnel.
- Spending is flat across 25-54 — broad mid-life appeal is a strategic asset.

Loyalty Segment Distribution

- Single-item buyers (New) dominate — retention is the #1 commercial lever.
- Loyal customers (3+ units) are small but high-value — nurture with VIP perks.

Subscription Status — Avg Basket Value



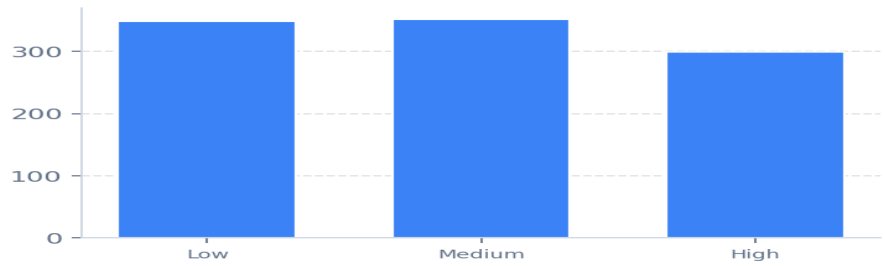
- Subscribers spend significantly more per transaction than non-subscribers.
- Converting +10% of shoppers to subscription tiers would meaningfully lift average ticket.

Retail Sales & Customer Shopping Trends Dashboard

Customer Behavior, Revenue Performance & Retail Insights

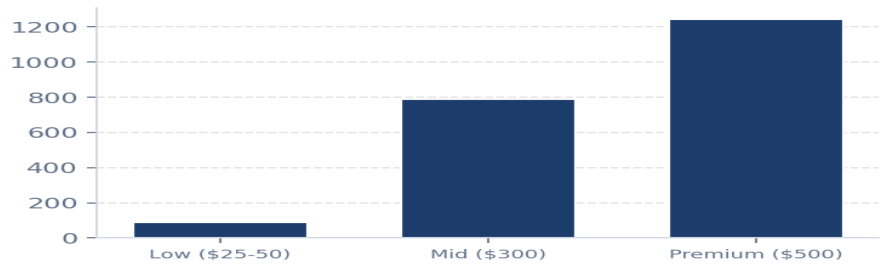
Customer Behavior Analysis

Spending Tier Distribution



- High Spenders are a meaningful share — premium SKUs are pulling weight.
- Medium Spenders are the largest growable cohort — fastest path to revenue lift.

Price-Tier Impact on Avg Basket



- Premium-priced items drive far higher basket value — discounting them erodes margin.
- Low-price items act as entry SKUs — keep them visible to attract first-time buyers.

Customer Behavior, Revenue Performance & Retail Insights

Product & Experience Analysis

Avg Review Rating by Category

- Ratings cluster above 4.0 — overall product satisfaction is healthy.
- Highest-rated categories are also the highest-value baskets — quality compounds with spend.

Units Sold by Category

- Clothing leads on volume — high-velocity, lower-ticket category.
- Electronics moves fewer units but higher-priced — protect inventory of premium SKUs.

Executive Summary

Revenue: $456,000 across 1,000 customers, averaging $456 per basket. **Top category:** Electronics. **Peak season:** Winter. **Top spending cohort:** 45-54.

Three priorities: (1) Retention — repeat rate at 74.7% leaves significant LTV on the table; build a returning-customer program. (2) Upsell — only 50.4% of baskets are multi-unit; bundle pricing and subscription nudges can lift average ticket. (3) Geographic / seasonal — fill the September trough with a flash-sale calendar; protect Winter performance with early holiday inventory.
